

## **Project Manager**

Manages large and/or multiple commercial projects to improve profitability and customer satisfaction. Interprets system sales and commitments into a detailed scope of work, and communicates that scope to all organizational elements. Reports on project progress and performance. Ensures that commitments have been met to ensure successful closure of the project. Assists in development and mentoring of Project Management personnel, in some cases, may have direct reports and cost center authority. Requires a Bachelor's degree or equivalent and eight to ten years of related experience.
